JVD.
PRODUCTS
THAT CARE

Hygiene, health, wellness and more... For more than 35 years, JVD has been designing, inventing, testing, developing and manufacturing products whose sole purpose is to take care of you, your employees, your customers and your visitors.

Taking care is so deeply rooted in our culture that we also take care to protect our environment by emphasizing eco-design, being environmentally responsible and prioritizing local partners and suppliers.

This care-taking mission, so near and dear to our hearts, is expressed through our creation of products dedicated to current and future uses, and designed to last.

JVD. Products that care.

CARE

CONTENTS

ALL THE QUALITY OF FRENCH-MADE PRODUCTS

Based in Nantes, in the west of France, **JVD is the leading designer and manufacturer of hygiene and hotel equipment solutions.**

Backed by our unique know-how, our company has now expanded into more than 100 countries around the world.

MADE IN FRANCE

But in spite of our international reach, JVD is still a local business. **Most of our products are manufactured from end to end at our site near Nantes,** in direct collaboration with our Engineering Department. Our in-house R&D team continuously develops new solutions to put innovation to work for the well-being of all their users.

JVD, MORE ENGAGED THAN EVER

ASSOCIATION EAU & VIE

Eau & Vie, a French NGO founded in 2008, was born out of the desire to **sustainably improve the living conditions of the most disavantaged populations.**

Eau & Vie is a public utility association of international solidarity that works to **strengthen the autonomy of populations by providing then with access to water** and by providing them with **knowledge on the importance of hygiene on a daily basis.**

A COMMON MISSION

For more than 35 years, JVD has been committed to a healthier world. **It is therefore only natural that we join** the Eau & Vie association in its fight for permanent access to quality running water and the development of collective awareness about the importance of hygiene in deprived urban neighbourhoods.

We also wanted to contribute to the dissemination of our values by engaging our clients in this common perspective. Therefore, we have joined forces with the Eau & Vie association and set up a partnership to fight for access to running water for all.
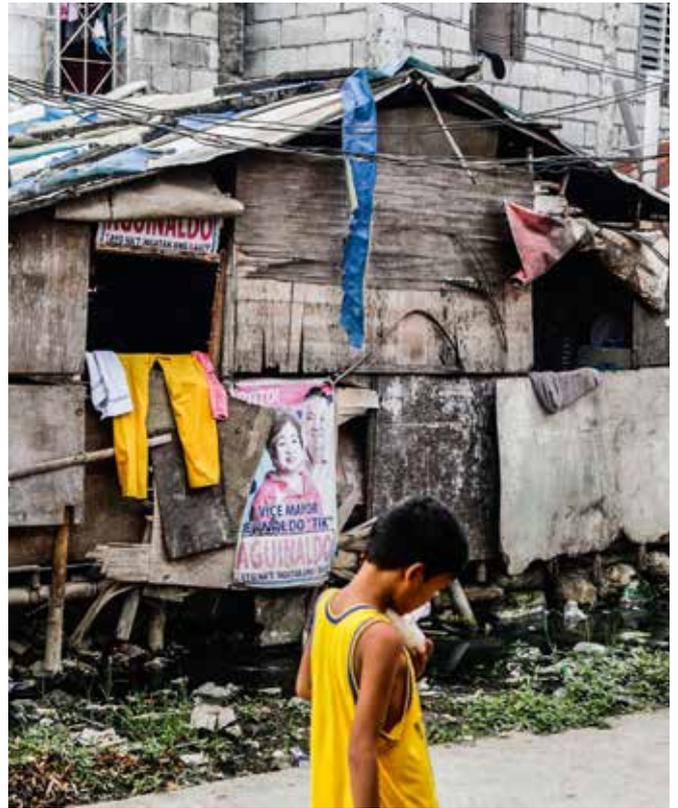

2.2 BILLION
people do not have acces to drinking water

3 AREAS
of interventions across the country: **Cavite, Taunauan and Mandaue-Cebu.**

19 SLUMS
benefit from running water at home, hygiene awareness and training in fire prevention and emergency plans thanks to the Eau & Vie association.

OUR COLLECTIONS

JVD
PRODUCTS
THAT
CARE

JVD offers a broad selection of equipment, lines and colours to adapt to your environment and make it unique. Thanks to our mastery of product design to production, **JVD is the only manufacturer able to offer matching sets** ranging from hand dryers to toilet roll dispensers by way of soap dispensers.

YALISS STAINLESS STEEL COLLECTION

NEW

Our Stainless Steel range offers the ideal balance between design and sturdiness. Its look fits into even the highest-end locations. **Its vandal resistance, antibacterial treatment and anti-fingerprint treatment** make it the solution of choice for the most demanding settings.

Lastly, its antioxidant treatment, applied to real Stainless Steel, endows it with tremendous resistance to corrosion and an extraordinarily long life.

PRODUCT ADVANTAGES

- Premium design
- 100% antibacterial
- Corrosion resistant, anti-vandal 304 Stainless Steel

KIDS
COLLECTION

The purpose of our Kids range is to help children to learn the basics of hygiene from a very young age. By making the experience of washing and drying their hands more enjoyable, **JVD provides a comprehensive solution, suitable for environments visited by children.** Thanks to our powerful yet quiet hand dryers, JVD also helps to **keep washrooms clean, with no wet paper roll on the floor and no clogged pipes.** By limiting their use of paper products, kids can also participate in the creation of a greener, more sustainable future by reducing the carbon footprint associated with using paper.

YALISS
COLLECTION

The more pronounced character of the Yaliss collection seeks to give your washrooms **a new image between gentleness and liveliness.** The products provide new responses to broader requirements: larger capacities, universal or removable cores and improved hygiene, whilst retaining all the qualities of the Cleanline collection (ease of use, personalization, etc.). To date, **this is the most complete collection for fitting out your washrooms.**

BLACK
COLLECTION

Black has the virtue of endowing an object with **a more qualitative value.** Whatever the ambiance of the place, Black products can fit in easily (and can be either discreet or highly visible). **The matte aspect amplifies the qualitative side of the product** and makes the solution less dirty and more scratch resistant. Ever in pursuit of solutions which can minimize our environmental impact, **the Black color has given us the opportunity to use recycled plastic.**

HYGIACONNECT®

HygiaConnect® is an IoT solution which guarantees that all indoor areas open to the public are both comfortable and hygienic.

| BENEFITS OF THE SOLUTION

REAL-TIME TRACKING

HygiaConnect® **provides an overview** of any points of dissatisfaction, excessive foot traffic, consumables outages, bin fullness levels, and fluctuations in odours.

MADE IN FRANCE

ALERTS

Whenever a piece of smart equipment approaches a critical threshold, **HygiaConnect® sends you an alert, so you can arrange for servicing as soon as possible.**

REPORTING

The HygiaConnect® solution provides **an overview of all your managed sites** and can be used to fuel discussions thanks to the various data it collects.

OUR HAND DRYERS

A hand dryer should not be chosen at random. Whether your constraints relate to usage, maintenance, noise or vandalism resistance, we have a large array of equipment suited to your environment.

COPT'AIR
REF 8 11 1168

EVERYTHING YOU NEED TO KNOW TO CHOOSE THE RIGHT HAND DRYER

VANDALISM RESISTANCE

In some places, special attention needs to be given to vandalism resistance. **Standard NF EN 62262 provides a clear interpretation of this level of resistance with the IK index. IK10 is the highest level of resistance.** A device of this type is able to tolerate at least a blow from a 5 kg sledgehammer. Devices with an aluminium or steel cover are even more resistant.

HOT OR COLD AIR

If the washroom in question has little to no heating, a cold sensation during hand drying can be unpleasant. And so we recommend opting for **a hand dryer which uses evaporation or jet air with a heating element.**

NOISE

The sound of a hand dryer can become a nuisance if located nearby an office or restaurant dining room. Most hot air hand dryers are relatively quiet. Some jet air hand dryers also manage to combine power with a low noise level.

HAND DRYERS VS PAPER TOWELS

Electric hand dryers offer the most responsible way to dry one's hands.

| **0 consumables** **0 waste** | **10 times less** expensive than paper | **Up to 75%** lower carbon emissions |

USAGE LEVEL

A hand dryer should provide a solution which is compatible with the level of usage of the washroom.

• **For places with little usage**
(< 50 visits daily), all three solutions are possible.

• **For places with normal usage**
(50-250 visits daily), the cost of paper becomes prohibitive.

• **For places with high usage**
(250-400 visits daily), jet air hand dryers are the only solution capable of guaranteeing cost control and a fast drying time.

• **Lastly, for places with intensive usage**
(> 400 visits daily), the chosen hand dryer should have a brushless motor or an induction motor.

ECOLOGICAL FOOTPRINT

It takes 17 trees to produce one tonne of paper. Its manufacturing and transport then generate significant amounts of CO2. For example, the French leader in paper consumables generates 30,000 tonnes of CO2 annually, just to transport its paper within France. In this respect, hand dryers are the ideal solution for reducing your ecological footprint.
Next-gen jet air hand dryers consume very little energy, and the absence of consumables renders the impact of transport anecdotal at best.

INITIATIVE EAU&VIE

JVD joins the Eau&Vie association in its fight for permanent access to quality running water and the development of collective awareness about the importance of hygiene in deprived urban neighbourhoods.
We also wanted to contribute to the dissemination of our values by engaging our clients in this common perspective. Therefore, we have joined forces with the Eau&Vie association and set up a partnership to fight for access to running water for all.

1 HAND DRYER = HYGIENE KIT GIVEN AWAY

For every hand dryer in the Air range (Exp'Air, Stell'Air, Copt'Air and Sup'Air) puchased **a hygiene kit will be distributed in underprivileged neighbourhoods in the Philippines.**

INTEGRATED SOLUTIONS

"For more than 30 years now, we have been imagining and building **built-in solutions to meet complex technical constraints.** Backed by our expertise in hand dryers, particularly for railway applications, we can scale any form of solution for our clients around blown air: **drying for industrial parts, space heaters, use in severe, restricted or confined environments, and so on.** Our mastery of simulations of systems' air flow behaviours allows us to very quickly reach perfectly **effective, personalized solutions.**"

Olivier DE BARBEYRAC, Technical Manager

SOAP

PAPER

AIR

A BESPOKE SOLUTION FOR ANY PUBLIC SPACE

SPACE, AESTHETIC, NORMATIVE, ACOUSTICAL, METEOROLOGICAL, USER BEHAVIOURAL CONSTRAINTS.

DESIGN & ERGONOMICS

Between design, efficiency and footprint limitations, you undoubtedly have multiple expectations. We can take all those demands into account to devise a **completely personalized solution for you.**

EXPERTISE

Having dealt with the most varied constraints over more than 30 years, we put our know-how at your disposal to provide you with fast responses and effective solutions.

BESPOKE DEVELOPMENT & PRODUCTION

Our R&D Department **designs and develops each bespoke built-in system for some of the most complex and difficult environments:** railway, industry, communities, high altitude, etc. Based at the same site in Nantes, our R&D and manufacturing teams work closely together to ensure flexibility and agility in the development and implementation of our clients' projects.

DRAGON

DRAGON
REF 8 22 009

MADE IN FRANCE

PRODUCT ADVANTAGES

- ⊕ Quiet (70 dB)
- ⊕ Longevity (induction motor)
- ⊕ Corrosion resistant in chlorinated atmospheres

CHARACTERISTICS

- Usage: high
- Noise level: 70 dB
- Anti-vandalism: IK10 ABS cover
- Dust filter
- Rated power: 2100 W
- Power supply: 220-240 V - 50 Hz
- CE - Class II - IP23
- 3 year warranty
- Dim.: 255 (L) x 280 (H) x 140 (D) mm

CALISTO II

CALISTO 2 000 W
+ Black universal support
Matte Black
REF 8 22 1632

CALISTO 2000 W + socket
Matte Black
REF 8 22 2107

PRODUCT ADVANTAGES

- ⊕ Brushless motor with a very long lifespan
- ⊕ Power: 2000 W
- ⊕ 6 drying settings
- ⊕ Fitted with an ionizing system

CHARACTERISTICS

- Power supply: 230 V - 50/60 Hz
- 6 drying settings:
- Air flow: 55 & 85 m^3/hr 3 temperatures
- A button for the cold position
- CE - Class II - IP20
- Volume area 2
- 3 year warranty
- Dim.: 264 (L) x 266 (H) x 90 (D) mm
- Cable length: 2270 mm

OUR DISPEN-SERS

With their optimized design and ergonomics, our dispensers are conceived and developed to be easy to use and to maintain.

YALISS JUMBO STAINLESS STEEL
REF 8 99 2103

YALISS ZIG-ZAG STAINLESS STEEL
REF 8 99 2102

YALISS SAVON STAINLESS STEEL
REF 8 44 2104

**PAGES
24 TO 40**

EVERYTHING YOU NEED TO KNOW TO CHOOSE THE RIGHT DISPENSER

UNIVERSAL

JVD's dispensers are considered to be "open" solutions, meaning any brand of consumable can be used in them (including brands which only offer proprietary equipment).
In addition, our soap dispensers feature built-in containers which can be filled with soap purchased in bulk (in jugs, for example). This solution is more economical and more ecological (less packaging).

PAPER

PAPER TOWEL DISPENSER FORMATS

Disposable folded paper is compatible with zig-zag devices. They are classified according to how the sheets are folded:
• Interleaved paper: W or Z
• Zig zag paper: V
• Folder paper: C
Disposable paper rolls with cores are compatible with auto cut devices. They come in the form of spools of different diameters and different lengths. Please note that some spools are only compatible with proprietary solutions.
Disposable paper rolls without cores are compatible with centre pull devices.

SOAP

AUTOMATIC OR MANUAL

Automatic soap dispensers are becoming increasingly common in washrooms. They are more hygienic as no contact with the device is required. They can also be more economical by limiting the flow.

SOAP, SANITIZER GEL OR FOAMING SOAP
Soap is available in two forms. Gel soap is the most common one on the market. Soap also comes in a foaming version.
With a suitable dispenser, this solution can:

cut by	and by
4X soap consumption	**50%** water consumption

CONTROLLED DISPENSING

At JVD, all our soap dispensers have pumps with gel/soap flow regulators.

That part controls how the soap comes out, preventing splatter on clothing or, worse still, in a user's eyes. It also generates savings, as it cuts the consumption of gel/soap in half.
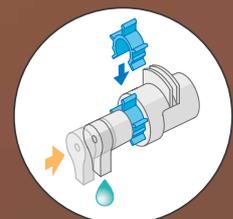

CLEANLINE COLLECTION

MADE IN FRANCE

THE CLEANLINE COLLECTION IS COMPATIBLE WITH MOST CONSUMABLES ON THE MARKET. THEIR LEVELS ARE ALWAYS VISIBLE AND THEY ARE EASY TO ACCESS. THIS RANGE IS COMPLETELY PERSONALIZABLE AND CAN BEAR THE CLIENT'S NAME OR LOGO.

PRODUCT ADVANTAGES

⊕ Economical (day/night mode, adjustable frequency)

⊕ On/off indicator lights

CHARACTERISTICS

- 3 modes:
  - Day (operates in the light)
  - Night (operates in the dark)
  - 24/7
- Programmable frequency of sprays: 7.5, 15 or 30 min
- Power supply: 2 LR14 (C, 1.5V) batteries (not included)
- Battery life: 30,000 sprays
- On/off indicator light
- Spray indicator light
- 2 year warranty
- Dim.: 95 (L) x 230 (H) x 95 (D) mm

OUR FLYING INSECT KILLERS

Explore our wide range of HACCP-compatible insect killers. Our bug killers can be installed anywhere, on a flat surface, hanging from the ceiling or attached to the wall.

PAGES
41 TO 47

EVERYTHING YOU NEED TO KNOW TO CHOOSE THE RIGHT INSECT KILLER

WHICH INSECTS?

Flying insect killers are designed to attract and kill flying insects, particularly flies and mosquitoes but also midges, wasps, hornets, horseflies and more.

WHERE SHOULD YOU INSTALL IT?

For optimal operation, your flying insect killer must be placed in a warm, dark place, sheltered from draughts and up in the air (whether mounted or hanging).

OPERATING PRINCIPLE

A flying insect killer is an illuminated electrical device which attracts flying insects with ultraviolet A rays (harmless to people) and then either electrocutes them, traps them with glue or aspirates them.

IP54 INDEX DEVICES?

IP54 devices are suitable for very humid environments. They are protected against sprays of water.

FRAGMENT RETENTION TUBES?

Unlike standard tubes, fragment retention tubes are covered with a protective film which avoids broken glass in the case of a blow. Fragment retention tubes are recommended for the agrifood industry in particular.

GLUE OR ZAPPER?

Bug zappers are non-polluting (no chemicals and no odours). They are safe (the high-voltage grids are always protected). Their recovery trays need to be emptied. Glue traps are non-polluting (no chemicals and no odours). They are safe. They do not cause any crackling or throw off any insect parts. They are perfectly suited to places with significant hygiene constraints. Their glue strips need to be replaced on a regular basis.

WHAT POWER FOR WHAT SURFACE AREA?

WASTE♻SORTING

EVERYTHING YOU NEED TO KNOW TO CHOOSE THE RIGHT BIN

SORTING: A MANDATORY REQUIREMENT

New European regulations and the French Energy Transition Law are increasing companies' obligations in respect of waste treatment. As a result, all French companies with more than 20 office workers have been required to sort and recycle their office paper since 1 January 2018. Companies, shops and administrations which entrust their waste to a private company or which generate more than 1,100 litres of waste per week and which use a public waste collection service must also organize their flows of paper, metal, plastic, glass and wood.

WASTE SORTING: A CLIMATE ACTION

If waste is not sorted, it cannot be recycled. The recycling process transforms waste into secondary raw materials, giving them a new lease of life. Thanks to appropriate sorting solutions (based on signage, form and size), employees are included in an eco-responsible movement that is beneficial to the company. JVD also offers solutions that can help you take your eco-responsible strategy a step further. By using our bins made of recycled cardboard or plastic, you can further reduce the impact of your waste on the climate.

SORTING WASTE IN THE RIGHT PLACE

To simplify the sorting process and encourage employees to take part in this eco-responsible approach, the choice of bin location is key. For example, bins for paper and other waste should be placed near office space, while larger sorting solution can be set up in break areas. Lastly, we recommend creating a clearly indicated, dedicated sorting area, close to where employees congregate, where you can house all your sorting containers.

SORTING INTO THE RIGHT SOLUTIONS

In addition to choosing the right location, it is also important to select the right receptacles. JVD offers a wide array of solutions designed for any setting, all of which are visible, easy to understand, easy to empty and suited to the quantity of waste produced.

304 Stainless Steel
REF 8 99 1075

PRODUCT ADVANTAGES

- Slient foot pedal
- Resistant: 304 Stainless Steel
- 2 casters at the back to simplify mobility with a breaking system

CHARACTERISTICS

- Comes as a kit: ready to assemble
- Made of Stainless Steel (18/0 or 304) and rubber
- Reinforced stability with 4 legs
- Assisted opening and closing
- Bag held in place with a rubber band
- Finish: Chrome
- Dim. (8 99 882): 550 (L) x 940 (H) x 425 (D) mm
- Dim. (8 99 1075): 590 (L) x 1000 (H) x 430 (D) mm

OUR ASHTRAYS

JVD's ashtrays are robust thanks to their thick walls, treated for outdoor use and UV resistant. They are practical and easy to empty as they are fitted with inner containers as well as anti-vandalism lock. Each ashtray comes with a kit to install it on the wall or in the ground.

TUBULAR ASHTRAY
REF 8 99 1000

**PAGES
58 TO 61**

EVERYTHING YOU NEED TO KNOW TO CHOOSE THE RIGHT ASHTRAY

WALL-MOUNTED ASHTRAYS

Wall-mounted ashtrays are to be fixed to the wall. Made of painted steel or Stainless Steel, they are very discreet and work great anywhere thanks to their compact size.

STANDING ASHTRAYS

Standing ashtrays are set up directly on the ground, where they can be fixed or not so they can be moved. Whether made of painted steel or Stainless Steel, their delicacy adds a touch of elegance to your smoking areas.

ASHTRAYS WITH BINS

Ashtrays with bins can save space while keeping your outdoor areas clean. They allow employees and visitors to throw out waste like cups and packaging.

FRENCH DECREE 2015-337

In Paris and most other cities and towns in France, the fight for cleanliness has become a priority. As a result, people who drop litter on public roads may receive a €68 ticket.

Establishments which are open to the public are therefore motivated to provide solutions: ashtrays, bins and combinations of the two can help contribute to meeting this policy.

Additionally, regulations on sidewalk cafés have become stricter. Because of this, many sidewalk café charters have been put in place or updated to compel owners to provide ashtrays to their customers.
