

THEY ARE HYGIACONNECTED!

IHU (University Hospital Institut) of Marseille has equipped its infectious diseases unit with the HygiaConnect Medical connected sanitiser dispensers. The staff was able to take advantage of **real-time monitoring, ensuring constant availability of solutions**, which is essential for the prevention of hospital-acquired infections.

AMORTISATION OF THE SOLUTION

(Within a 25-bed unit)

€17,335 annually

Linked with **Medical costs**

€1,373.8 annually

Linked with **Labour costs**

€977.5 annually

Linked with **Purchasing costs**

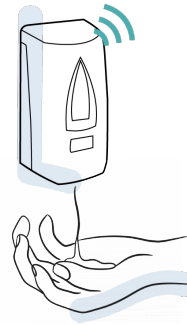

€8,074

Costs of purchase and outsourced installation of HygiaConnect Medical.

TOTAL COST OF
€19,686.3

ROI in
- 6 months

STEP UP THE FIGHT AGAINST HOSPITAL-ACQUIRED INFECTIONS

HYGIACONNECT MEDICAL

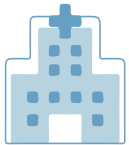

THE FIRST SMART HAND HYGIENE
CONNECTED (IOT) SOLUTION

HOSPITAL-ACQUIRED INFECTIONS (HAI)

8.9 million patients in Europe contract an HAI every year [1]

1/18 hospitalised patients in France are affected by at least one HAI [2]

50% HAIs can be prevented by proper hand hygiene [3]

IoT SOLUTION

The HygiaConnect Medical solution is based on the expertise of JVD and the performance of MoveWork, an "all-in-one" facility management platform. MoveWork orchestrates all workflows, ensuring real-time monitoring of hand hygiene indicators in the hospital environment.

BENEFITS OF THE SOLUTION

1 ENHANCING BEHAVIOURAL CHANGE

Through a field indicator

- Real-time remote monitoring of sanitiser consumption
- Shareable with all teams in report form
- Based on actual sanitizer consumption at the patient's bed (not at the purchase)

2 REPRIORISING TIME AND CARE

- Automatical generating reports
- End of manual reporting and administrative burden
- Improved accuracy of the reports

3 SECURING HAND SANITISER AVAILABILITY

By avoiding shortages

- E-mail alerts for refiling
- Real-time visualisation of sanitiser quantity

4 REDUCING THE COSTS

- By 50% of medical costs associated with HAI
- By 40% of human costs associated with sanitiser management
- By 49% of purchasing costs associated with the supply of bulk solution

In addition to providing teams with the right data at the right time, the HygiaConnect Medical solution ensures information sharing with decision-makers and institutions in charge of regional or national fight against hospital-acquired infections.
