

Take care of
people.
**And also the
planet.**

JVD: PRODUCTS THAT TAKE CARE OF YOU

For more than 40 years, our business has been about caring for the needs of our clients, their employees and their visitors. But our mission goes far beyond simply manufacturing products. To us, “care” is a global commitment, a philosophy that also encompasses responsibility towards the planet.

Our environmental commitment is a key concern for us, and last year, our efforts were once again rewarded by the prestigious EcoVadis Gold Medal, in recognition of our work on eco-design and sustainability. This award is a real source of pride for us, as it confirms our choice of path and reinforces our determination to go even further.

Day after day, we work hard to shrink our environmental footprint whilst continuing to innovate and design sustainable products, created with the future in mind.

JVD. Products that care.

 **ECO-DESIGN**

WHY CHOOSE JVD?

40 YEARS OF INNOVATION IN THE SERVICE OF WELL-BEING

Backed by four decades of existence – and above all experience – JVD has become **the essential company in field of hygiene for hotels and municipalities**. Thanks in particular to our Engineering Department and our close collaboration with the world of design, JVD is at the forefront of innovation today.

We conceive, design, manufacture and rigorously test all our products. Our strong, meticulous industrial processes guarantee the best possible quality, from the smallest components to our full customer service!

40,000 hand dryers and
400,000 paper and soap
dispensers are produced each year
at our site in Rezé, France

ALL THE QUALITY OF FRENCH-MADE PRODUCTS

With our international reach, JVD now has a foothold in more than 100 countries around the world. Even so, JVD has intentionally remained a local business.

Based outside Nantes, in France's Loire-Atlantique department, we source components from neighbouring departments, out of a concern for promoting local know-how and forging lasting relationships with our partners. **As a result, many JVD products are manufactured from end to end within a 200 kilometre radius of our base.** **With JVD, all the quality and innovation of French-made products is exported to you!**

100 countries currently benefit from JVD's homegrown expertise

MEETING THE DEMAND FOR OPTIMAL SERVICE

At JVD, **the quality of our customer service is as important as the quality of our products...** and that's saying a lot! Which is why you'll find the same responsiveness, the same attentiveness and the same desire to satisfy all of your requests, whether you're in Nantes or Singapore, Mexico or Germany.

The strength of our sales and customer service teams is built on their ability to put themselves in your shoes and to create a truly **close relationship** with you. Whether you interact with us by phone or by email, you'll feel like your JVD contact is right there with you!

5 days a week, our customer service team is here to listen and deliver personalised service to you

Reborn
By JVD

COMMITTED TO REFURBISHING

In 2024, Reborn by JVD became **the first refurbishing solution for hand dryers**. That project extends product lifespans by refurbishing them at our premises in Rezé, whilst recovering any discarded parts. **JVD has partnered with a vocational rehabilitation centre to train people with disabilities and people returning to work** on refurbishing and rebuilding these appliances.

At JVD, eco-responsibility is central to our strategy. From design to manufacturing, and from transport to recycling and repairs, we strive to reduce our social and environmental impact. In addition, we support the solidarity economy through partnerships like the one with Better with Water, and we also fight planned obsolescence. **At JVD, we are committed and engaged for the long haul.**

JVD is one of the **5%** of companies in our category to have earned the EcoVadis Gold Medal

OUR COLLECTIONS

JVD offers a broad selection of equipment, lines and colours to adapt to your environment and make it unique. Thanks to our mastery of product design to production, **JVD is the only manufacturer able to offer matching sets** ranging from hand dryers to toilet roll dispensers by way of soap dispensers.

YALISS STAINLESS STEEL OUR STYLISH, ROBUST COLLECTION

Our stainless steel range offers the ideal balance between design and sturdiness. Its look fits into even the highest-end locations. **Its vandal resistance, antibacterial treatment and anti-fingerprint treatment** make it the solution of choice for the most demanding settings. **Lastly, its antioxidant treatment, applied to real stainless steel, endows it with tremendous resistance to corrosion and an extraordinarily long life.**

KIDS

OUR COLLECTION FOR THE YOUNGEST USERS

The purpose of our Kids range is to help children to learn the basics of hygiene from a very young age. By making the experience of washing and drying their hands more enjoyable, JVD provides a comprehensive solution, suitable for environments visited by children. Thanks to our powerful yet quiet hand dryers, JVD also helps to keep washrooms clean, with no wet paper roll on the floor and no clogged pipes. By limiting their use of paper products, kids can also participate in the creation of a greener, more sustainable future by reducing the carbon footprint associated with using paper.

YALISS

OUR MOST STYLISH COLLECTION

The more pronounced character of the Yaliss collection seeks to give your washrooms a new image combining gentleness with liveliness. The products provide new responses to broader requirements: larger capacities, universal or removable cores and improved hygiene, whilst retaining all the qualities of the Cleanline collection (ease of use, personalisation, etc.). This French-made collection features a decisive design capable of elevating all your washrooms.

CLEANLINE

OUR 100% RECYCLED COLLECTION

JVD's teams spent several months working with our partners in the plastics industry on the development and viability of the use of recycled plastic for injecting our parts made of ABS. Made in France using 100% recycled plastic, the Cleanline range pairs elegance with eco-design to meet the needs of establishments that are open to the public. This range is available in white, black and metallic grey. Other advantages include the fact that it is compatible with most consumables on the market, their levels are always visible, and they are easy to access.

OUR AIR PURIFIERS

PAGES 8-13

WELCOME TO THE FUTURE OF HYGIENE, WHERE EVERY BREATH COUNTS

Using our air purifiers means investing in your customers' health, wellness and productivity. Our air purifiers are designed to be the faithful companions of even the most demanding customers, creating spaces where every inhalation is full of efficiency and tranquillity.

THREE GREAT REASONS TO FIT OUT YOUR CUSTOMERS WITH AIR PURIFIERS

1. TO RESPOND TO A PUBLIC HEALTH ISSUE

Recent news stories have raised general awareness of the need to take care of our indoor air. Our purifiers effectively meet your customers' health and social needs. Indoor air tends to be eight times more polluted than outdoor air, and our solutions deliver a targeted response to that reality.

2. TO REDUCE THE ECONOMIC IMPACT OF POOR INDOOR AIR QUALITY

The numbers speak for themselves! The cost of poor air quality in the workplace averages out at €40 per year, per employee. Our purifiers provide a proactive solution that improves productivity and cuts health-related costs, positioning your customers for economic efficiency.

3. TO PROTECT THE MOST SENSITIVE INDIVIDUALS

Our air purifiers are specially designed to meet the health needs of the most sensitive groups, such as care home residents and small children. These devices offer optimal protection, guaranteeing environments that are free of any health risks and demonstrating our commitment to everyone's well-being.

AN AIR PURIFIER FOR EVERY SPACE

FOR OFFICES

Benefits: Increased productivity, concentration, comfort and management of odours (from food, perspiration, etc.)

Shield: Conference rooms, dining rooms and break rooms

Shield Compact: Individual offices and small meeting rooms

FOR CARE HOMES / CHILDCARE CENTRES / MUNICIPALITIES

Benefits: Management of strong odours and reduced risk of cross-contamination

Shield: Common areas like elderly day care rooms, activities rooms, game rooms and treatment rooms

Shield Compact: Private bedrooms and near changing tables

FOR MEDICAL PRACTICES

Benefits: Reduced risk of cross-contamination (seasonal viruses, bacteria, etc.) and improved management of strong body odour

Shield: Waiting rooms

Shield Compact: Exam rooms and treatment rooms

A COMBINATION OF UNPARALLELED RESULTS AND A MASTERFUL DESIGN

PATENTED TECHNOLOGY:

SMART MINERALISATION®

Our air purifiers capture and destroy pollutants. They have been tested by independent labs, using the protocols of the most demanding standards on the market.

ZERO CONSUMABLES

Not only does Smart Mineralisation® deliver unparalleled results, but it also allows the device's technological components to self-decontaminate, eliminating the need to frequently restock or replace consumables.

DESIGN BY RAMY FISCHLER

The Shield range of air purifiers was crafted by designer Ramy Fischler, a member of the French Order of Arts and Letters since 2016, named Designer of the Year in 2018.

INNOVATION
BREVETÉE JVD

The Smart Mineralisation® technology used in our Shield devices requires no consumables or filters that have to be replaced. Our air purifiers were designed to last, using easily recyclable materials like steel.

OUR HAND DRYERS

PAGES 16-29

DON'T GO SOFT WHEN CHOOSING A HAND DRYER

A hand dryer should not be chosen at random. Whether your constraints relate to usage, maintenance, noise or vandal resistance, we have a large array of equipment suited to your environment.

JVD will be celebrating its 40th anniversary in 2024. For this special occasion, we will be extending the warranties on certain models of hand dryers to 10 years, for any purchases made in 2025! The extended warranty can be activated on jvd.fr.

MORE ECONOMICAL THAN PAPER

Now that paper pulp has more than doubled in price, jet air hand dryers are the only solution that can guarantee cost control in high-traffic washrooms. With their fast drying time, hand dryers are ten times less expensive than paper towels.

MORE ECOLOGICAL THAN DISPENSERS

It takes **17 trees** to produce one tonne of paper. Its manufacturing and transport then generate significant amounts of CO2. In this respect, hand dryers are the ideal solution for reducing your ecological footprint. **Next-gen jet air hand dryers consume very little energy, and the absence of consumables renders the impact of transport anecdotal at best.**

COMFORT AT ANY TEMPERATURE

If the washroom in question has little to no heating, a cold sensation during hand drying can be unpleasant. In these cases, opt for a hand dryer which uses evaporation or jet air with a heating element.

AVOID NOISE POLLUTION WITH RELEVANT MODELS

The sound of a hand dryer can become a nuisance if located nearby an office or restaurant dining room. **Most hot air hand dryers are relatively quiet.** Some jet air hand dryers also manage to combine power with a low noise level.

PUT AN END TO VANDALISM

Standard NF EN 62262 provides a clear interpretation of the level of vandal resistance with the IK index. **IK10 is the highest level of resistance.** A device of this type is able to tolerate at least a blow from a 5 kg sledgehammer. Devices with an aluminium or steel cover are even more resistant.

For the last 40 years, JVD has been developing and manufacturing products which take care of people. So, it was only natural for us to **join the association Better with Water** in its fight for continuous access to high-quality running water at home and for the development of collective awareness of the importance of hygiene in underprivileged urban neighbourhoods. **In 2024, JVD donated €6,000 to Better with Water, funding personal hygiene workshops in the Philippines, as well as the distribution of close to 6,500 hygiene kits.**

A HAND DRYER FOR EVERY SPACE

RESTAURANTS

They experience heavy washroom usage for short periods of time. The **Stell'air** delivers rapid drying speed and, thanks to its quiet design, is suitable for the peaceful, sophisticated atmospheres of the most intimate restaurants.

GYMS

Their washrooms are often poorly heated, if not unheated, and experience spikes in usage. The **Copt'air S**, which is fitted with an automatically activated heating element, guarantees quick drying times and an enjoyable experience.

SHOPPING CENTRES & AIRPORTS

The washrooms in shopping centres and airports are subject to intense usage. The **Exp'air**, which comes with a brushless motor, is designed to handle very heavy foot traffic and is also suitable for all types of users (children and adults of all mobility levels), thanks to its unique design.

MUNICIPALITIES

Washrooms in local government buildings tends to receive limited foot traffic, but these devices may be subjected to acts of vandalism. The **Master** hand dryer, with its IK10 steel cover and its very long lifespan, is the perfect choice for this purpose.

ENVIRONMENTS SUBJECT TO UNPLEASANT ODOURS

Whether dealing with sewer backups or other bad odours, some washrooms can really put their users to the test. The **Sup'air Fresh** combines rapid drying with odour neutralisation, thanks to a patented JVD innovation featuring zero chemical and zero consumables.

OFFICES

To maintain a peaceful atmosphere that's conducive to work whilst delivering quick hand drying, the **Stell'air** is the perfect hand dryer for use in offices.

BARS

The compactness and quick drying time of the **Sup'air** is perfectly suited to this type of washroom, with its highly variable foot traffic and, in many cases, confined spaces.

HOSPITALS & OTHER MEDICAL INSTITUTIONS

In these locations that demand impeccable hygiene and that receive a wide variety of different users, the **Exp'air** guarantees a clean floor thanks to its water collection tray, while its unique design makes it suitable for use by people with reduced mobility.

INDUSTRY

In this demanding environment, where washrooms experience major spikes in usage during breaks, the **Copt'air** is ultra-sturdy thanks to its IK10 aluminium cover and delivers incomparably quick drying times.

SCHOOLS

What could be a better place for kids to learn to dry their hands than a school washroom? With the **Exp'air** and **Sup'air Kids**, JVD has the perfect solution for practising good habits in a fun way and delivering flawless hand hygiene.

+ PRODUCT PLUSES

+ ULTRA-FAST DRYING

+ Automatically activatable heating element

+ Water collection tray

+ ECO-DESIGN

- Low energy consumption

CHARACTERISTICS

- Drying time: 15-20 seconds
- Usage: High
- Hot air: Automatically activatable heating element
- Noise level: 77 dB
- Vandalism protection: IK10 ABS
- Air filter included
- 600 ml water collection tray
- Rated power: 1400 W (600 W without heating element)
- Power supply: 220-240 V - 50 Hz
- CE - Class II - IP24
- Finishes: Metal Grey or White
- 2 year warranty
- Dim. (mm): 250 (W) x 467 (H) x 165 (D)

OUR DISPENSERS

PAGES 32-47

FIND YOUR FUTURE DISPENSERS IN NO TIME FLAT

With their optimised design and ergonomics, our dispensers are conceived and developed to be easy to use and maintain.

MODELS THAT WORK WITH ANY CONSUMABLES

JVD's dispensers are considered to be "open" solutions, meaning any brand of consumable can be used in them (including brands which only offer proprietary equipment). Our soap dispensers feature built-in containers which can be filled with soap in bulk (from jugs, for example). **This solution is more economical and more ecological** (less packaging).

FOLDED OR ROLLS: CHOOSE THE RIGHT PAPER!

Disposable folded paper is compatible with our Zig-Zag devices. They are classified according to how the sheets are folded:

- Interleaved paper: W or Z
- Zig zag paper: V
- Folder paper: C.

Disposable paper rolls with cores are compatible with auto cut devices. They come in the form of spools of different diameters and different lengths. Please note that some spools are only compatible with proprietary solutions. Disposable paper rolls without cores are compatible with centre pull devices.

AUTOMATIC SOAP DISPENSERS: SO CONVENIENT

Automatic soap/hand sanitiser dispensers are becoming increasingly common in washrooms. **They are more hygienic as no contact with the device is required.** They can also be more economical by limiting the flow.

GEL OR FOAMING SOAP / HAND SANITISER: WHICH IS THE MOST ECONOMICAL?

Our soap dispensers come in multiple formats. **The most common one on the market is designed for gel soap / hand sanitiser.** Dispensers also come in foaming soap versions. With the right pump, this solution can reduce consumption as follows:

- **soap consumption cut by up to a factor of four**
- **up to 50% less water usage.**

All our soap dispensers are fitted with pumps that regulate the flow of soap, to prevent it from spattering on users' clothes or in their eyes.

PLASTIC: UP TO 100% RECYCLED

The Cleanline range has taken a major step forward by using 100% recycled materials. If an environmentally friendly approach to impeccable hygiene is important to you, then these products are the ones you want.

CLEANLINE

COLLECTION

100% RECYCLED

MADE IN FRANCE

The Cleanline collection is compatible with most consumables on the market. Their levels are always visible, and they are easy to access. This range is completely personalisable and can bear the distributor's brand name or logo.

+ PRODUCT PLUSES

- + Automatic hand detection
- + Large capacity (1.1 L)
- + Eco-friendly (flow limited to 1 ml every 3 seconds)
- + Compatible with hand sanitiser

CHARACTERISTICS

- Automatically shuts off when the cover is open
- Automatic hand detection
- Translucent level indicator
- Flow: 1 ml per dose
- Delivers 1 dose every 3 seconds
- Power supply: 4 LR6 (AA, 1.5V) batteries (not included)
- Locks with a key
- Meets HACCP requirements
- 1 year warranty
- Subject to eco-recycling
- Dim. (mm): 140 (W) x 235 (H) x 107 (D)

P. 55

OUR INSECT CATCHERS

PAGES 48-55

CHOOSE THE INSECT CATCHER THAT WILL HIT YOUR TARGET

Explore our wide range of HACCP-compatible insect catchers. Our bug killers can be installed anywhere, on a flat surface, hanging from the ceiling or attached to the wall.

KEEP YOUR SPACE CLEAN

Insect catchers are designed to attract and kill all kinds of flying insects, including flies, mosquitoes, midges, wasps, hornets, horseflies and more. Our insect catchers are illuminated electrical devices that attract flying insects with ultraviolet A rays (harmless to people) and then either electrocute them, trap them with glue or aspirate them.

FIND THE PERFECT SPOT FOR YOUR INSECT CATCHER

For optimal operation, your insect catcher should be placed in a warm, dark place, sheltered from draughts and up in the air (whether mounted or hanging).

CONSIDER THE SPECIAL STANDARDS APPLICABLE TO HUMID SPACES

IP54 devices are protected against splashing water and are especially well-suited to **very wet, humid environments**.

PREVENT THE RISK OF BREAKAGE WITH FRAGMENT RETENTION TUBES

Unlike standard tube light bulbs, fragment retention tubes are covered with a **protective film** which prevents broken glass in the case of a blow. Fragment retention tubes are recommended for the agrifood industry in particular.

ELECTROCUTION, GLUE OR ASPIRATION? CHOOSE THE MODEL THAT MEETS YOUR NEEDS

Bug zappers are non-polluting (no chemicals and no odours). They are safe (the high-voltage grids are always protected). Their collection trays need to be emptied.

Glue traps are non-polluting (no chemicals and no odours). They are safe. They do not cause any crackling or throw off any insect parts. Their glue strips need to be replaced on a regular basis. Glue traps are recommended for spaces with specific hygiene constraints, like kitchens and restaurants. Aspiration fans are perfectly hygienic and a great choice for spaces with substantial hygiene constraints.

MAKE THE MOVE TO LED BULBS

Lighting regulations are changing, in favour of more sustainable, planet-friendly options. As a result, all fluorescent bulbs designed for everyday lighting purposes have been phased out and banned from sale in the European Union since September 2023. In anticipation of the ban on UV lights (slated for 2027), we are switching all our insect killers to LED bulbs now.

LEDs consume 50% less electricity and function for 50,000 hours (twice as long as fluorescent tubes).

METAL BINS

REF 8 99 2293

P. 73

OUR WASTE SORTING SOLUTIONS

PAGES 56-75

ONE TWO TRI : THREE POINTS TO CONSIDER WHEN CHOOSING YOUR BINS

Between bins for offices, washrooms, kitchens and recycling, JVD has a wide range suited to all your different spaces.

POINT NO. 1: ALIGNING YOUR ORGANISATION WITH YOUR LEGAL OBLIGATIONS

European regulations and the French Energy Transition Law are increasing companies' obligations in respect of waste treatment. All French companies with more than 20 office workers are now required to sort and recycle their office paper. Companies, shops and administrations which entrust their waste to a private company or which generate more than 1,100 litres of waste per week and which use a public waste collection service must also organise their flows of paper, metal, plastic, glass and wood, meaning they must have bins for each category of waste.

POINT NO. 2: ENCOURAGING WASTE SORTING AS A FORM OF CLIMATE ACTION

If waste is not sorted, it cannot be recycled. **The recycling process transforms waste into secondary raw materials and gives them a new lease of life.** Thanks to appropriate sorting solutions (based on signage, form and size), your employees can be included in an eco-responsible movement that is beneficial to your company. **JVD also offers solutions that can help you take your eco-responsible strategy a step further.** By using these bins made of recycled cardboard or plastic, you can further reduce the impact of your waste on the climate.

POINT NO. 3: INSTALLING THE RIGHT SOLUTIONS IN THE RIGHT PLACES

To simplify the sorting process and encourage your employees to take part in this eco-responsible approach, your choice of sorting bin locations is essential.

Bins for paper and other waste should be placed near office space, while larger sorting solutions can be set up in break areas. Lastly, you can create a clearly indicated, dedicated recycling area close to where employees congregate, where you can house all your sorting containers. Be sure to select appropriate receptacles. **JVD offers a wide array of solutions designed for any setting**, all of which are visible, easy to understand, easy to empty and suited to the quantity of waste produced.

STANDING ASHTRAY

REF 8 99 503

P. 80

OUR ASHTRAYS

PAGES 76-81

FIND JUST THE RIGHT ASHTRAYS FOR YOUR ENVIRONMENT

JVD's ashtrays are robust thanks to their thick walls, treated for outdoor use and UV resistant. They are practical and easy to empty as they are fitted with inner containers as well as an anti-vandalism lock. Each ashtray comes with a kit to install it on the wall or in the ground.

HELP KEEP YOUR TOWN CLEAN

In Paris and most other cities and towns in France, the fight for cleanliness has become a priority. **As a result of French decree 2015-337, people who drop litter on public roads may receive a €68 ticket.** Establishments which are open to the public are now motivated to provide solutions: ashtrays, bins and combinations of the two can help contribute to meeting this policy. Additionally, regulations on pavement cafés have become stricter. Because of this, many pavement café charters have been put in place or updated to compel owners to provide ashtrays to their customers.

TAKE UP LESS SPACE WITH A WALL-MOUNTED ASHTRAY

Wall-mounted ashtrays are attached to a wall. Made of painted steel or stainless steel, they are **very discreet** and work great anywhere thanks to their compact size.

OPT FOR ELEGANCE WITH A STANDING ASHTRAY

Standing ashtrays are **installed directly on the ground**, where they can be fixed (or not, if you want to be able to move them). Whether made of painted steel or stainless steel, their delicacy adds a touch of elegance to your smoking areas.

BOOST YOUR CONVENIENCE WITH AN ASHTRAY WITH A BIN

Ashtrays with bins can **save space while keeping your outdoor areas clean**. They allow your employees and visitors to throw out waste like cups and packaging.

REF 8 99 1843

+ PRODUCT PLUSES

- + Large capacity (10 L)
Easy to empty
- + Very resistant to bad weather (plastic) and sunny weather (UV treatment)

CHARACTERISTICS

- Plastic that is weather and impact resistant
- UV treated coating
- Grained texture to prevent scratching
- Removable 10 L inner compartment made of galvanised steel
- Rust resistant, stainless steel stubbing plate
- Quick and easy installation with no tools required for assembly
- Possibility of fixing to the ground

Dimensions (mm):
350 (W) x 950 (H) x 350 (D)

ASHTRAYS WALL-MOUNTED

WALL-MOUNTED ASHTRAY
3 L + integrated 14 L collector

REF 8 99 1170

WALL-MOUNTED ASHTRAY
1.5 L

REF 8 99 501

WALL-MOUNTED ASHTRAY

REF 8 99 1452

BASE AND STAND FOR
WALL-MOUNTED ASHTRAY
Slim 3 L

REF 8 99 1451

+ PRODUCT PLUSES

+ ANTI-VANDALISM
Key locking system

+ READY TO INSTALL
Mounting kit included

+ Designed for outdoor use

+ Protected against the rain

+ Fast and easy to empty

+ Easy to clean, smooth surface

CHARACTERISTICS

- Galvanised steel and epoxy exterior for better corrosion resistance
- UV treated coating
- Grained texture to prevent scratching
- Inner container of galvanised steel
- Stubbing area made of stainless steel
- Key locking system
- Mounting kit included

Capacities and dimensions:

8 99 1170:

- 3 L (900 butts) + 14 L collector
- 300 (W) x 670 (H) x 140 (D) mm

8 99 501:

- 1.5 L (150 butts with a 0.5 L container)
- 150 (W) x 255 (H) x 60 (D) mm

8 99 502:

- 3 L (900 butts with a 0.5 L container)
- 191 (W) x 355 (H) x 60 (D) mm

8 99 1452:

- 3 L (900 butts)
- 100 (W) x 500 (H) x 64 (D) mm

8 99 1451:

- 250 (W) x 990 (H) x 200 (D) mm

STANDING WALL-MOUNTED

WALL-MOUNTED TUBULAR
ASHTRAY
1.8 L Charcoal Grey

REF 8 99 884

WALL-MOUNTED TUBULAR
ASHTRAY
1.8 L Stainless Steel

REF 8 99 1839

+ PRODUCT PLUSES

- + Designed for protected outdoor use
- + Very attractive with a brushed or shiny finish
- + Fast and easy to install
- + Fire resistant

- + **PRACTICAL**
Easy to empty

CHARACTERISTICS

- Key locking system
- Wall mounting
- Mounting kit included

8 99 884:

- Charcoal Grey epoxy
- Ø. 110 (Ø) x 500 (H) mm

8 99 1839:

- Shiny Stainless
- Ø. 110 (Ø) x 500 (H) mm

STANDING RECTANGULAR

STANDING ASHTRAY 12.5 L

REF 8 99 503

+ PRODUCT PLUSES

- + Designed for outdoor use
- + Protected against the rain
- + Fast and easy to empty
- + Easy to clean, smooth surface

CHARACTERISTICS

- Inner container of galvanised steel
- Stubbing area made of stainless steel (2 openings)
- Galvanised steel and epoxy exterior for better corrosion resistance
- UV treated coating
- Key locking system
- Ground fixing kit (screws and bolts) included
- Weighted base to ensure stability (7.4 kg)

Capacity and dimensions:

- 2.5 L (3,750 butts)
- 400 (W) x 1040 (H) x 400 (D) mm

STANDING TUBULAR

3 L TUBULAR STANDING ASHTRAY

REF 8 99 616

+ PRODUCT PLUSES

- + Designed for outdoor use
- + Fully galvanised, resistant to bad weather and UV rays
- + Fast and easy to empty (container accessible from above)

CHARACTERISTICS

- Inner container of galvanised steel
- Stubbing area made of stainless steel (4 openings)
- Galvanised steel and epoxy exterior for better corrosion resistance
- UV treated coating
- Ground fixing kit (screws and bolts) included
- Weighted base to ensure stability (6.5 kg)

Capacity and dimensions:

- 3 L (900 butts)
- Ø. 300 (Ø) x 1080 (H) mm

STANDING TUBULAR STAINLESS

TUBULAR ASHTRAY
on stand (3 L) Stainless

REF 8 99 1840

+ PRODUCT PLUSES

- + Designed for outdoor use
- + 4 points of access to stub out cigarette butts
- + Possibility of fixing to the ground

CHARACTERISTICS

Colour and material:

- Shiny 304 Stainless Steel
- Ground fixing kit (screws and bolts) included

Dimensions:

- Ø. 300 (Ø) x 1080 (H) mm

+ ROBUST

Galvanised inner container

ASHTRAYS WITH BINS

3 L ASHTRAY WITH
29 L BIN

REF 8 99 1062

4.7 L ASHTRAY WITH
48 L BIN

REF 8 99 1082

2 L ASHTRAY WITH
8 L BIN

REF 8 99 615

+ PRODUCT PLUSES

+ PRACTICAL

- Galvanised inner container
- Designed for outdoor use
- Protected against bad weather
- Fast and easy to empty

CHARACTERISTICS

- Material: Galvanised steel (rust and corrosion resistant)
- UV treated coating
- Inner container of galvanised steel
- Stubbing area made of stainless steel
- Possibility of fixing to the ground
- Key locking system
- Ground fixing kit included
- Colour: Charcoal Grey

Capacities and dimensions:

8 99 1062:

- 3 L ashtray (900 butts) + 29 L bin
- 300 (W) x 990 (H) x 250 (D) mm

8 99 1082:

- 4.7 L ashtray (1,400 butts) + 48 L bin
- 480 (W) x 990 (H) x 250 (D) mm

8 99 615:

- 2 L ashtray (600 butts) + 8 L bin
- 400 (W) x 1040 (H) x 260 (D) mm

WASHROOM SET-UPS

In France, the set-up of company washrooms is governed by legislative texts that aim to protect employee health and safety. These texts define minimum standards that must be met in terms of the number of washrooms, their equipment, their maintenance and their accessibility.

Here are the legal references that are applicable to company washroom set-ups:

French Labour Code: Articles R4228-2 to R4228-13 define the employer's obligations in respect of washroom facilities.

Article R4228-7

- Sinks must be supplied with drinking water.
The temperature of the water must be adjustable, and there must be at least one sink for every 10 employees. Appropriate washing and drying or wiping equipment must be available to workers. That equipment must be maintained and replaced whenever necessary.
- Article R4228-10
- There must be at least one toilet stall and one urinal for every 20 men and two stalls for every 20 women. [...] At least one stall must be fitted with a sink.
At establishments that employ both women and men, the toilet stalls must be separated by gender. Women's toilet stalls must contain a recipient for their menstrual products.

Article R4228-11

- Toilet stalls [...] must be set up so as not to emit any odours. They must be fitted with flushes and toilet paper.

Article R4228-12

- Toilet stalls must be ventilated in accordance with ventilation and sanitation rules [...] and sufficiently heated.

Article R4228-13

- The employer must have the stalls and urinals cleaned and disinfected at least once a day.
- It should be noted that these legal texts apply to all companies, regardless of size. However, the French Labour Inspectorate may grant special dispensations, depending on the nature of the company's activities or its technical constraints.
- Regulation (EC) No 852/2004 – Chapter I(4)
- An adequate number of washbasins is to be available, suitably located and designated for cleaning hands. Washbasins for cleaning hands are to be provided with hot and cold running water, materials for cleaning hands and for hygienic drying.

WASTE SORTING & MANAGEMENT

In France, the treatment of company waste is governed by multiple legislative texts. The most relevant of these are reproduced below.

French Environmental Code Article L541-21-1

- Those who generate or hold significant quantities of waste primarily comprising biowaste are required to set up sorting for that biowaste at its source, as well as either:
- on-site biowaste recovery; or
- the separate collection of biowaste for the purpose of its recovery and, in particular, to encourage its high-quality use on the ground.
- As from 31 December 2023, this obligation will apply to all biowaste producers and holders, including local and regional governments providing public waste management services and private and public establishments that generate biowaste.

French Environmental Code Article L541-21-2-1

- All waste producers and holders must put in place separate rubbish and recycling facilities in their establishments, that are suited to the various activities performed in those establishments and, when relevant, those facilities must be accessible by staff in order for waste to be sorted at the source, including waste generated by the staff's consumption of everyday consumer goods.

French Environmental Code Article L541-21-2-2

- Operators of establishments that are open to the public, as defined by Article L123-1 of the French Building and Housing Code, must organise the collection of separated waste left by the public at their establishments and the waste generated by their own personnel. To that end, they must provide the public with separate receptacles for waste from household packaging – primarily comprising plastic, steel, aluminium, paper and cardboard – on the one hand, and biowaste on the other.
- Regulation (EC) No 852/2004 – Chapter VI(2)
- Food waste, non-edible by-products and other refuse are to be deposited in closable containers, unless food business operators can demonstrate to the competent authority that other types of containers or evacuation systems used are appropriate. These containers are to be of an appropriate construction, kept in sound condition, be easy to clean and, where necessary, to disinfect.

FRENCH AGECE FOOD WASTE AND CIRCULAR ECONOMY LAW

Article 58 of the French law of 10 February 2020 against food waste and in favour of the circular economy (AGEC) has been implemented by public buyers since March 2021. This mechanism requires State buyers and local and regional governments to source reused versions of certain products or versions that contain recycled materials.

Beginning on 1 January 2022, if a product is repaired under its statutory compliance warranty during the first two years after its purchase, the customer's warranty will be extended by an additional six months, for a total warranty period of 30 months (two years plus six months).

HACCP

HACCP (Hazard Analysis Critical Control Point) is a systematic, preventive approach to guaranteeing food safety by identifying and controlling biological, chemical and physical hazards in production processes which could make the finished product unsafe for consumption. HACCP is based on seven core principles:

1. Conduct a hazard analysis
2. Determine the critical control points (CCPs)
3. Establish critical limits
4. Establish monitoring procedures
5. Establish corrective actions
6. Establish verification procedures
7. Establish record-keeping and documentation procedures.

HACCP is used in a variety of sectors in the food industry, including production, preparation, packaging and distribution, to manage food safety along the entire supply chain.

A product itself cannot be "HACCP compliant" as HACCP is a food health and safety management method, not a standard that is specific to a given product or category of products. However, a product can be deemed compliant with the food safety requirements defined by a HACCP system that has been implemented by a company.

AIR QUALITY

Air quality in the workplace is governed by multiple legislative and regulatory texts. The most relevant of these are outlined below.

1. Article **L221-7** of the French Environmental Code stipulates that the State will coordinate work to identify the factors that cause pollution and to evaluate exposure levels and health risks relating to air quality in enclosed environments. It introduces preventive and management measures designed to reduce the scope and the effects of that pollution.
2. Article **D221-38** of the French Environmental Code specifies that air quality monitoring in certain establishments that are open to the public must be performed according to the methods laid down in French Decree 2012-14 of 5 January 2012.
3. Article **L221-8** of the French Environmental Code indicates that indoor air quality monitoring is compulsory for the owner or operator of certain establishments that are open to the public, as determined by a French Council of State decree, where justified by the configuration of the premises or the type(s) of public visitors.
4. Article **R221-34** of the French Environmental Code stipulates that the owner, or if applicable the operator, of the establishment must retain last two assessments of ventilation mechanisms and analyses of pollutant measurements.
5. Article **L221-10** of the French Environmental Code mentions that building products, furnishings, wall and floor coverings, paint and varnish that emit substances into the ambient air must feature labels indicating their

volatile pollutants.

NF C15-100

The standard NF C15-100 includes specific instructions relating to electricity in bathrooms. Given that bathrooms are environments where water is present and where the risk of electrocution is higher, special precautions must be taken to ensure electrical safety.

INSECTS

Establishments that are open to the public have obligations in terms of insect control. Those obligations are defined in department health regulations and in Articles 125.1 and 130.5 of the French memorandum on the subject, dated 9 August 1978.

The owners or managers of these establishments must take every necessary measure to prevent insects from entering the property and have extermination actions taken as needed, whilst avoiding any contamination of foodstuffs.

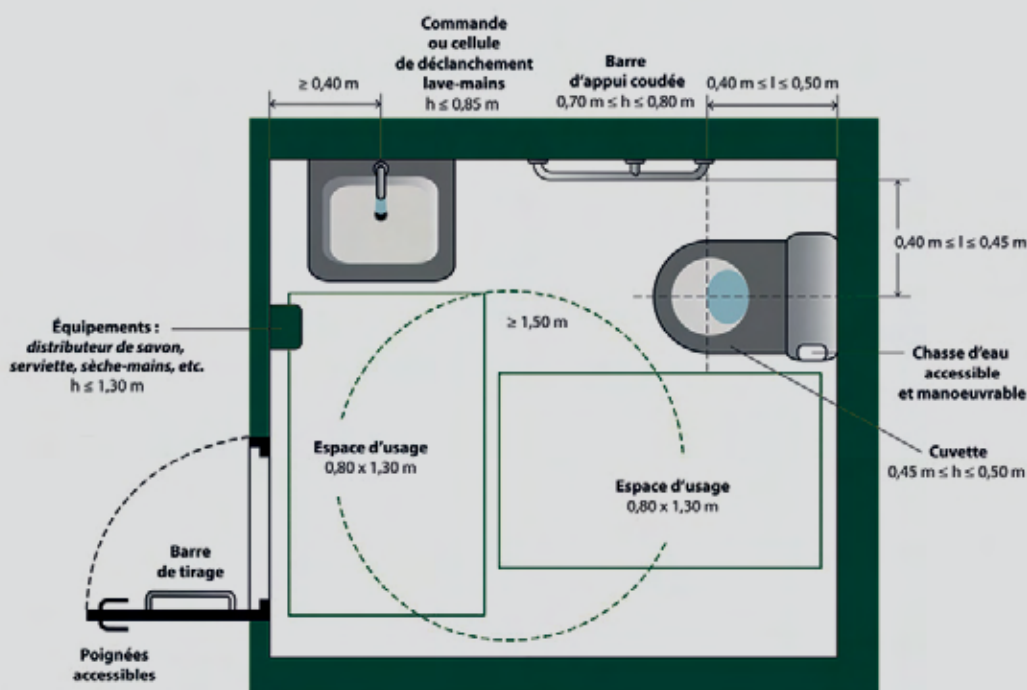

As part of their health control plans, all restaurateurs must implement an effective system to prevent the intrusion of pests (rodents, flying and crawling insects, etc.) into their premises. That plan must include a pest eradication plan and a list of good hygiene practices to follow, such as insect control efforts.

ACCESSIBILITY

Different French decrees and laws define accessibility rules for people with reduced mobility, namely including the decree of 8 December 2014 and 20 April 2017.

The arrangements required of establishments open to the public include the following:

- At least one wheelchair accessible toilet stall with a sink on accessible floors of the building.
- Wheelchair accessible washrooms must be in the same location as the other toilet stalls, in cases where the non-accessible stalls are grouped together
- Soap and paper dispensers, hand dryers and sinks must be accessible by people with disabilities. At least one of each of these fixtures and devices must be compliant with current accessibility standards.
